NRW B B 9.15 Annex 1

GLASTIR CONSENTS/ASSENTS ISSUED BY NATURAL RESOURCES WALES 1st November 13 to 31st October 14

Around 50% of all consents appear to be for Glastir agreements, however, a large number of Glastir proposals do not result in a consent being required/issued. Furthermore, many of the Glastir consents are more complex than those issued for other reasons and therefore the statistics do not necessarily reflect the staffing workload. The volume of Glastir work varies significantly from one operational team to another.

Advanced

1427 cases were referred to Natural Resources Wales by WG and Natural Resources Wales issued 864 Notice of Intents, with 552 consents being completed

Entry

234 cases were referred to Natural Resources Wales by WG and Natural Resources Wales issued 103 consents
